Name Signature Title

* **Important Disclosures:** ICCF seeks to facilitate the Islamic principles' requirements of avoiding *Riba* ("interest") and of pooling Muslims' financial resources as a cooperative for the advancement of Islamic values and American Muslims. ICCF pool is not a bank, and thus not FDIC-insured. There has been significant variability in ICCF annual performance and distribution; ranging from zero % to 10.2 %. Past performance is not necessarily an indication of future performance. All investments involve risk, including principal loss. NAIT assesses 1.5% ICCF pool overhead charge annually to fund operations. To facilitate preservation of participants' funds, NAIT uses the conservative procedure of retaining a part of the gains during good years to shoulder losses in years of economic downturn. No Intra-year gain or loss is assessed. Quantum of the annual gain that is distributed and what is held in the ICCF pool are dependent upon multiple years' performance. NAIT Board of Trustees makes this determination in its sole discretion, in its annual meeting during the First Quarter of the following year. Visit www.NAIT.Net for NAIT Articles of Incorporation and Board of Trustees.
